INTRODUCING

Wonder[™]

STANDER
BE INDEPENDENT.

STANDER

STANDER TODAY

Today Stander has designed dozens of mobility products for every room in the home. Stander has deepened its core values of independence and happiness for all those involved with mobility challenges and designing & producing the highest quality products. Stander will remain committed to these ideals because they help people Be Independent.

THE STANDER STORY

Stander, Inc is a company committed to helping the elderly, disabled and their caregivers Be Independent. We are a family owned and operated business, founded in 1998 by Troy & Jan Miller of Logan, Utah. Their inspiration came from Jan's 90 year-old Grandma Essie, who wanted to remain independent in her own home. Essie had no desire to move into a long-term care facility, but the few mobility products available at that time were limited in function and all had the look & feel of sterile hospital equipment. Troy & Jan saw a huge need for solutions that would help Essie live safely, comfortably, and independently in her own home. Troy put his creative genius to work and started designing unique, ergonomic, mobility solutions, which would blend with the look of a home and help Grandma Essie safely and independently live her best life.

Troy's original designs have expanded, so that today Stander provides mobility solutions for every room in the home -as well as for travel. Stander is still owned by the Miller Family, with core values intact that create abundance, freedom, and independence for family, friends, employees, caregivers & their loved ones. We remain committed to our mission to provide innovative products that help people live safely and comfortably in their own homes, so they can **BE INDEPENDENT.**
